Joshua Linus

Ensono Summer Intern 2019

To whom it may concern:

I am pleased to recommend Joshua Linus, who has been an intern on the Global Assurance and Advisory team the summer of 2019. As a Sr. Information Assurance Manager, I have had firsthand experience working directly with Joshua on day to day deliverables, managing tight project deadlines and client engagements.

Joshua Linus is an exceptional student and rare combination of natural ability and a willingness and eagerness to learn. Joshua possess excellent verbal and written communication skills. He was not fazed by challenging assignments and was able to meet and deliver promptly on assigned tasks. Joshua exemplified great team spirit by planning and coordinating events for the rest of the interns.

During his internship Joshua's assignments included supporting the following team functions; Third Party Risk Management, IT General Control Assessment utilizing a Standard Information Gathering Tool (SIG), Audit Support and Governance Risk and Compliance tasks. Joshua has a strong technology background which allowing him to grasp concepts very quickly and apply them in his daily work.

Joshua's innovation extended beyond his day to day task to the Ensono CEO Challenge where he presented on a Vendor Risk Implementation Project.

Joshua is an excellent candidate for any organization or program looking for a rising professional who is self-motivated and capable of achieving any goal he sets his mind to. I'm sure Joshua will have a bright career and will be a great asset to any organization.

I fully endorse Joshua Linus without hesitation or reservation.
